

What Changed?

Electra watched the red ball roll.
"Why did the ball go there?"

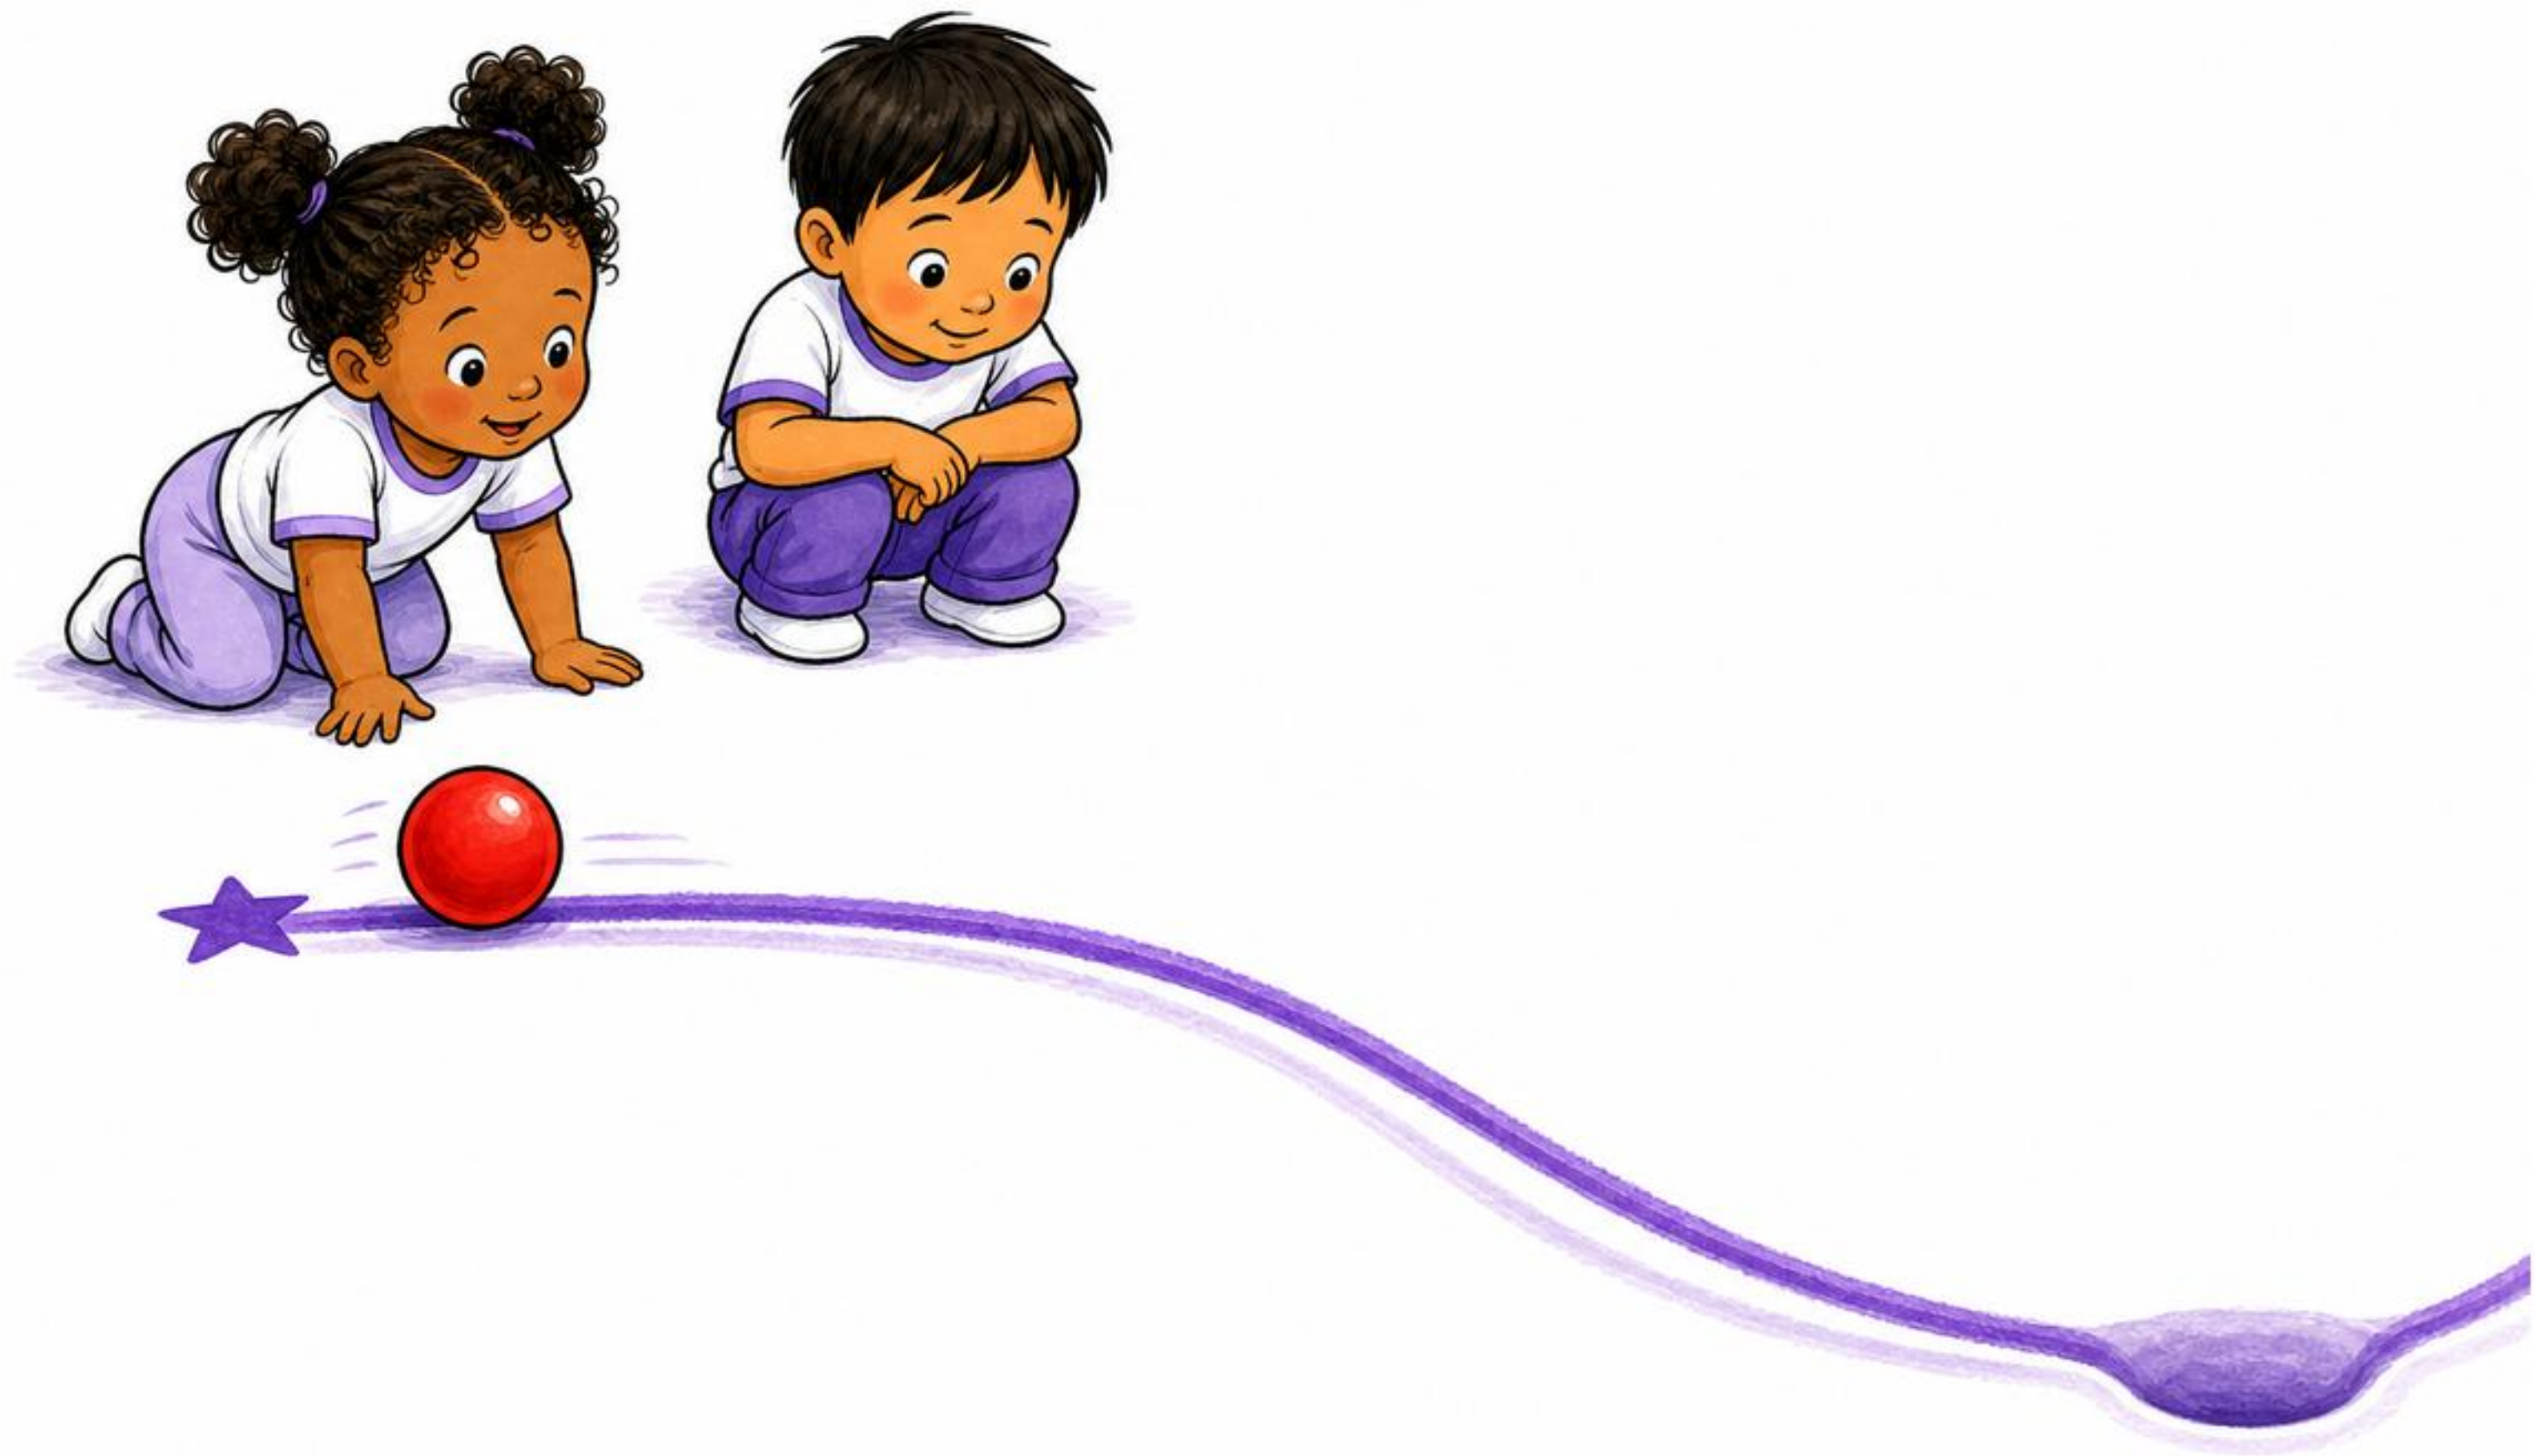

The red ball rolled from the star.
It stopped in the dip.

Poz drew the path.
"This is what happened."

"If we try again,"
Electra asked,
"where will it go?"

Same start.
Same push.
Same path.

Poz changed one thing.
Only one.

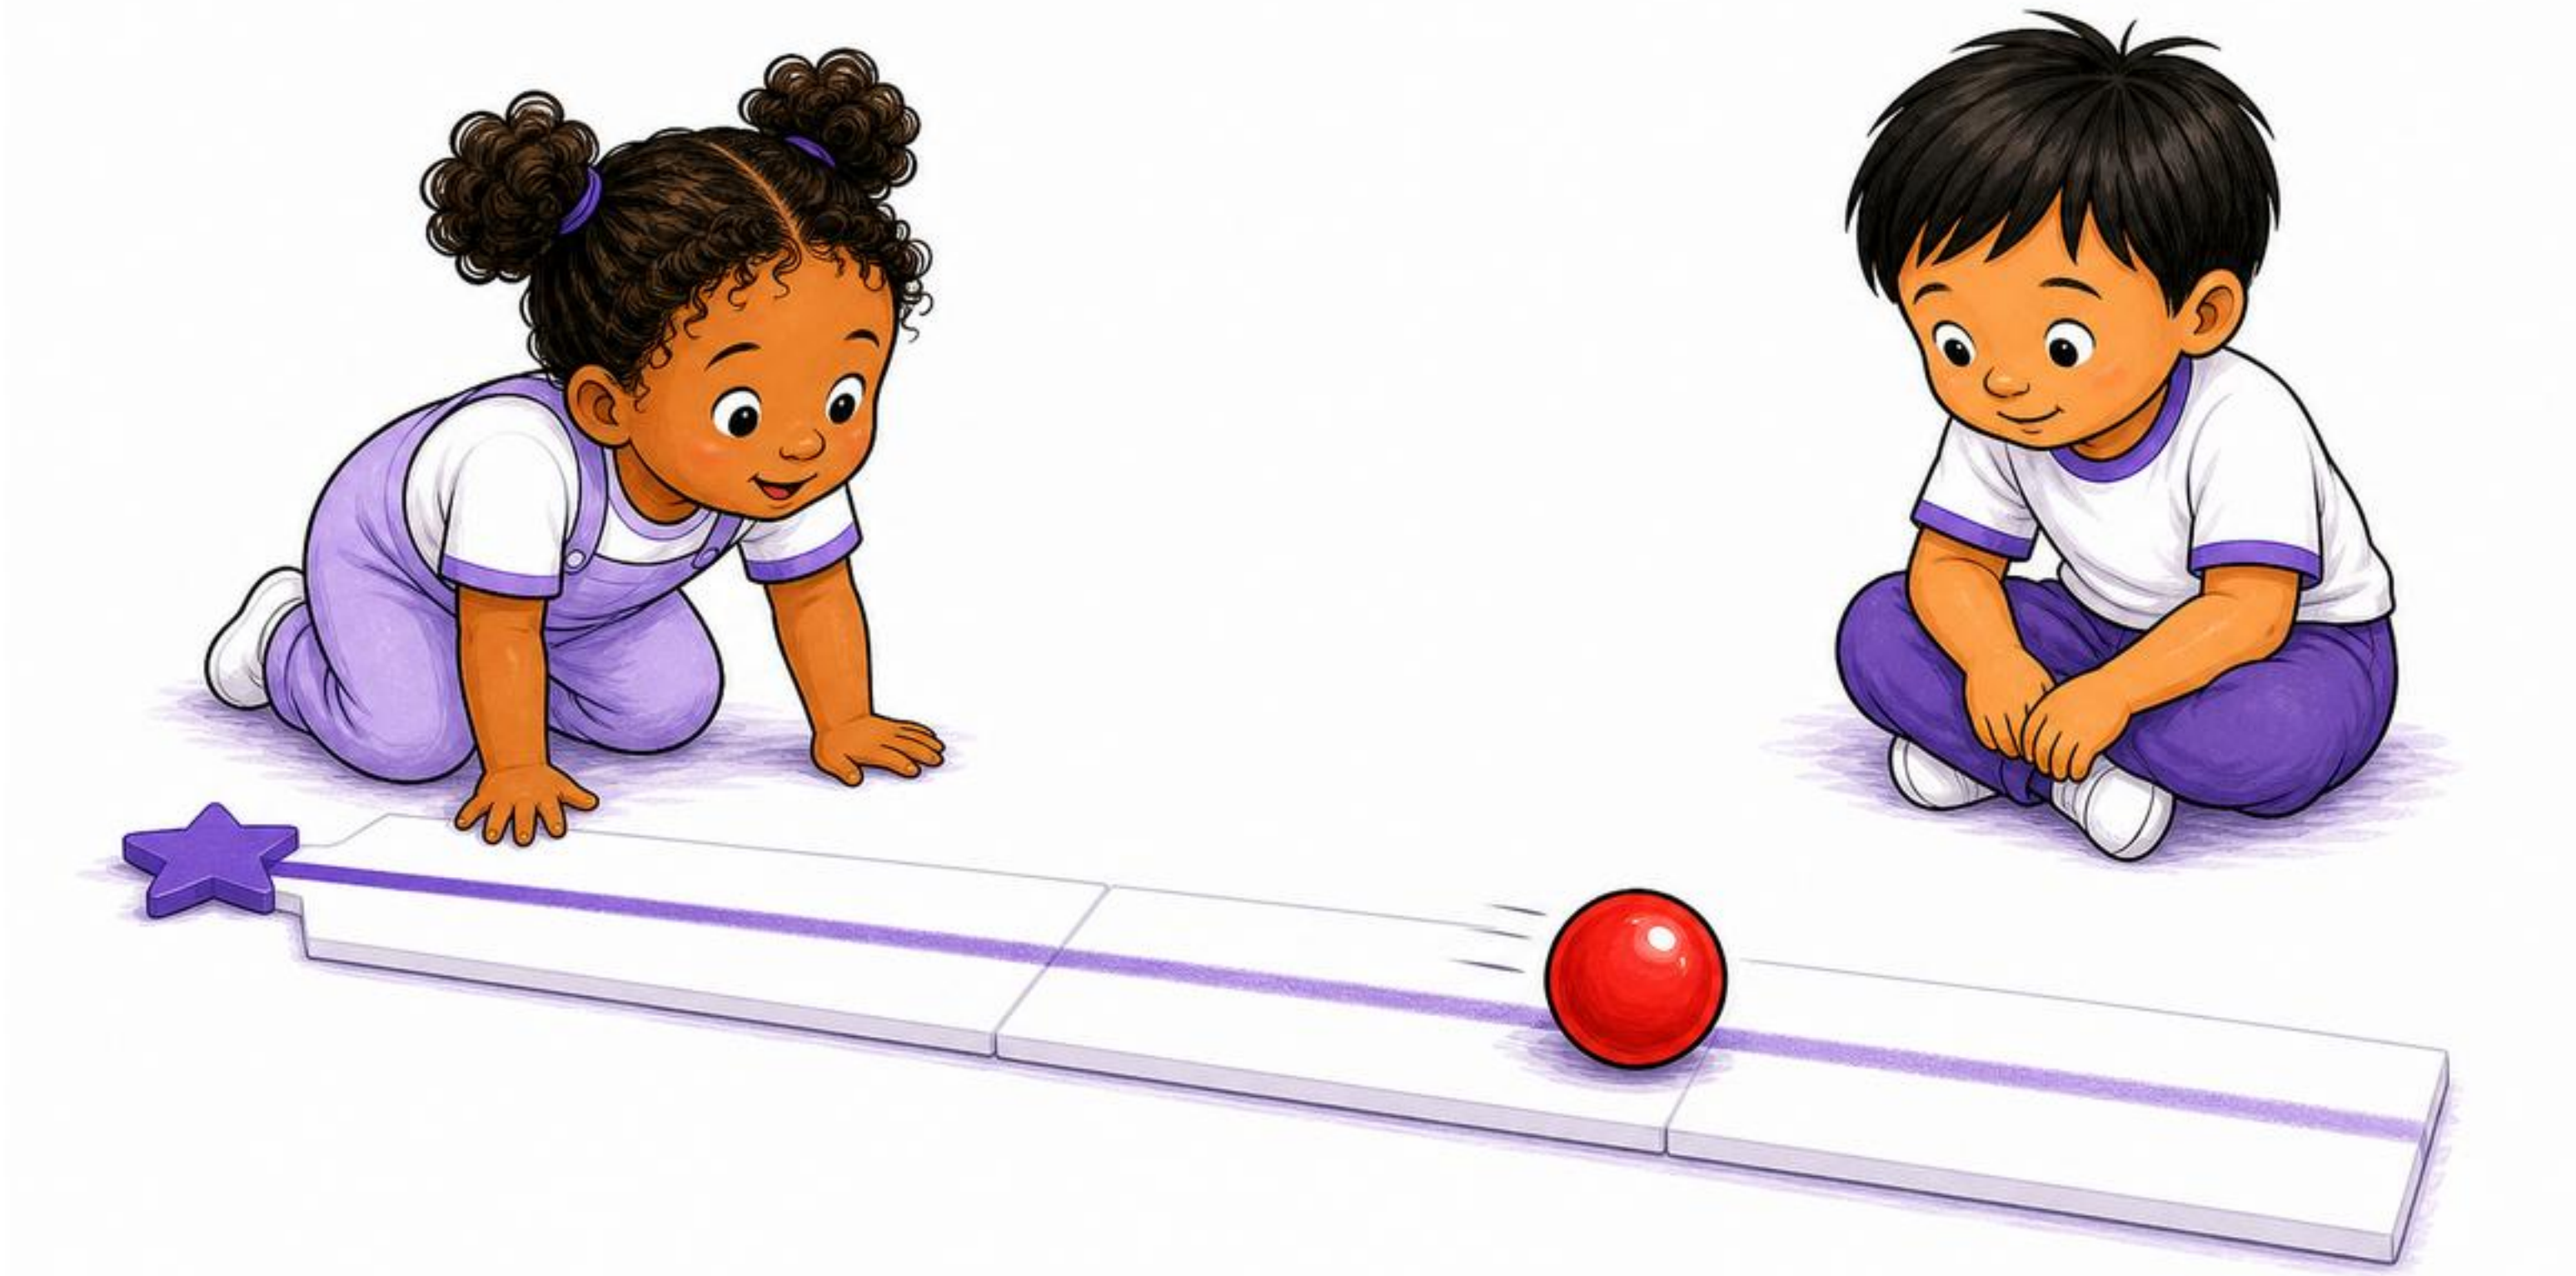

The ball rolled again.
This time it turned left.

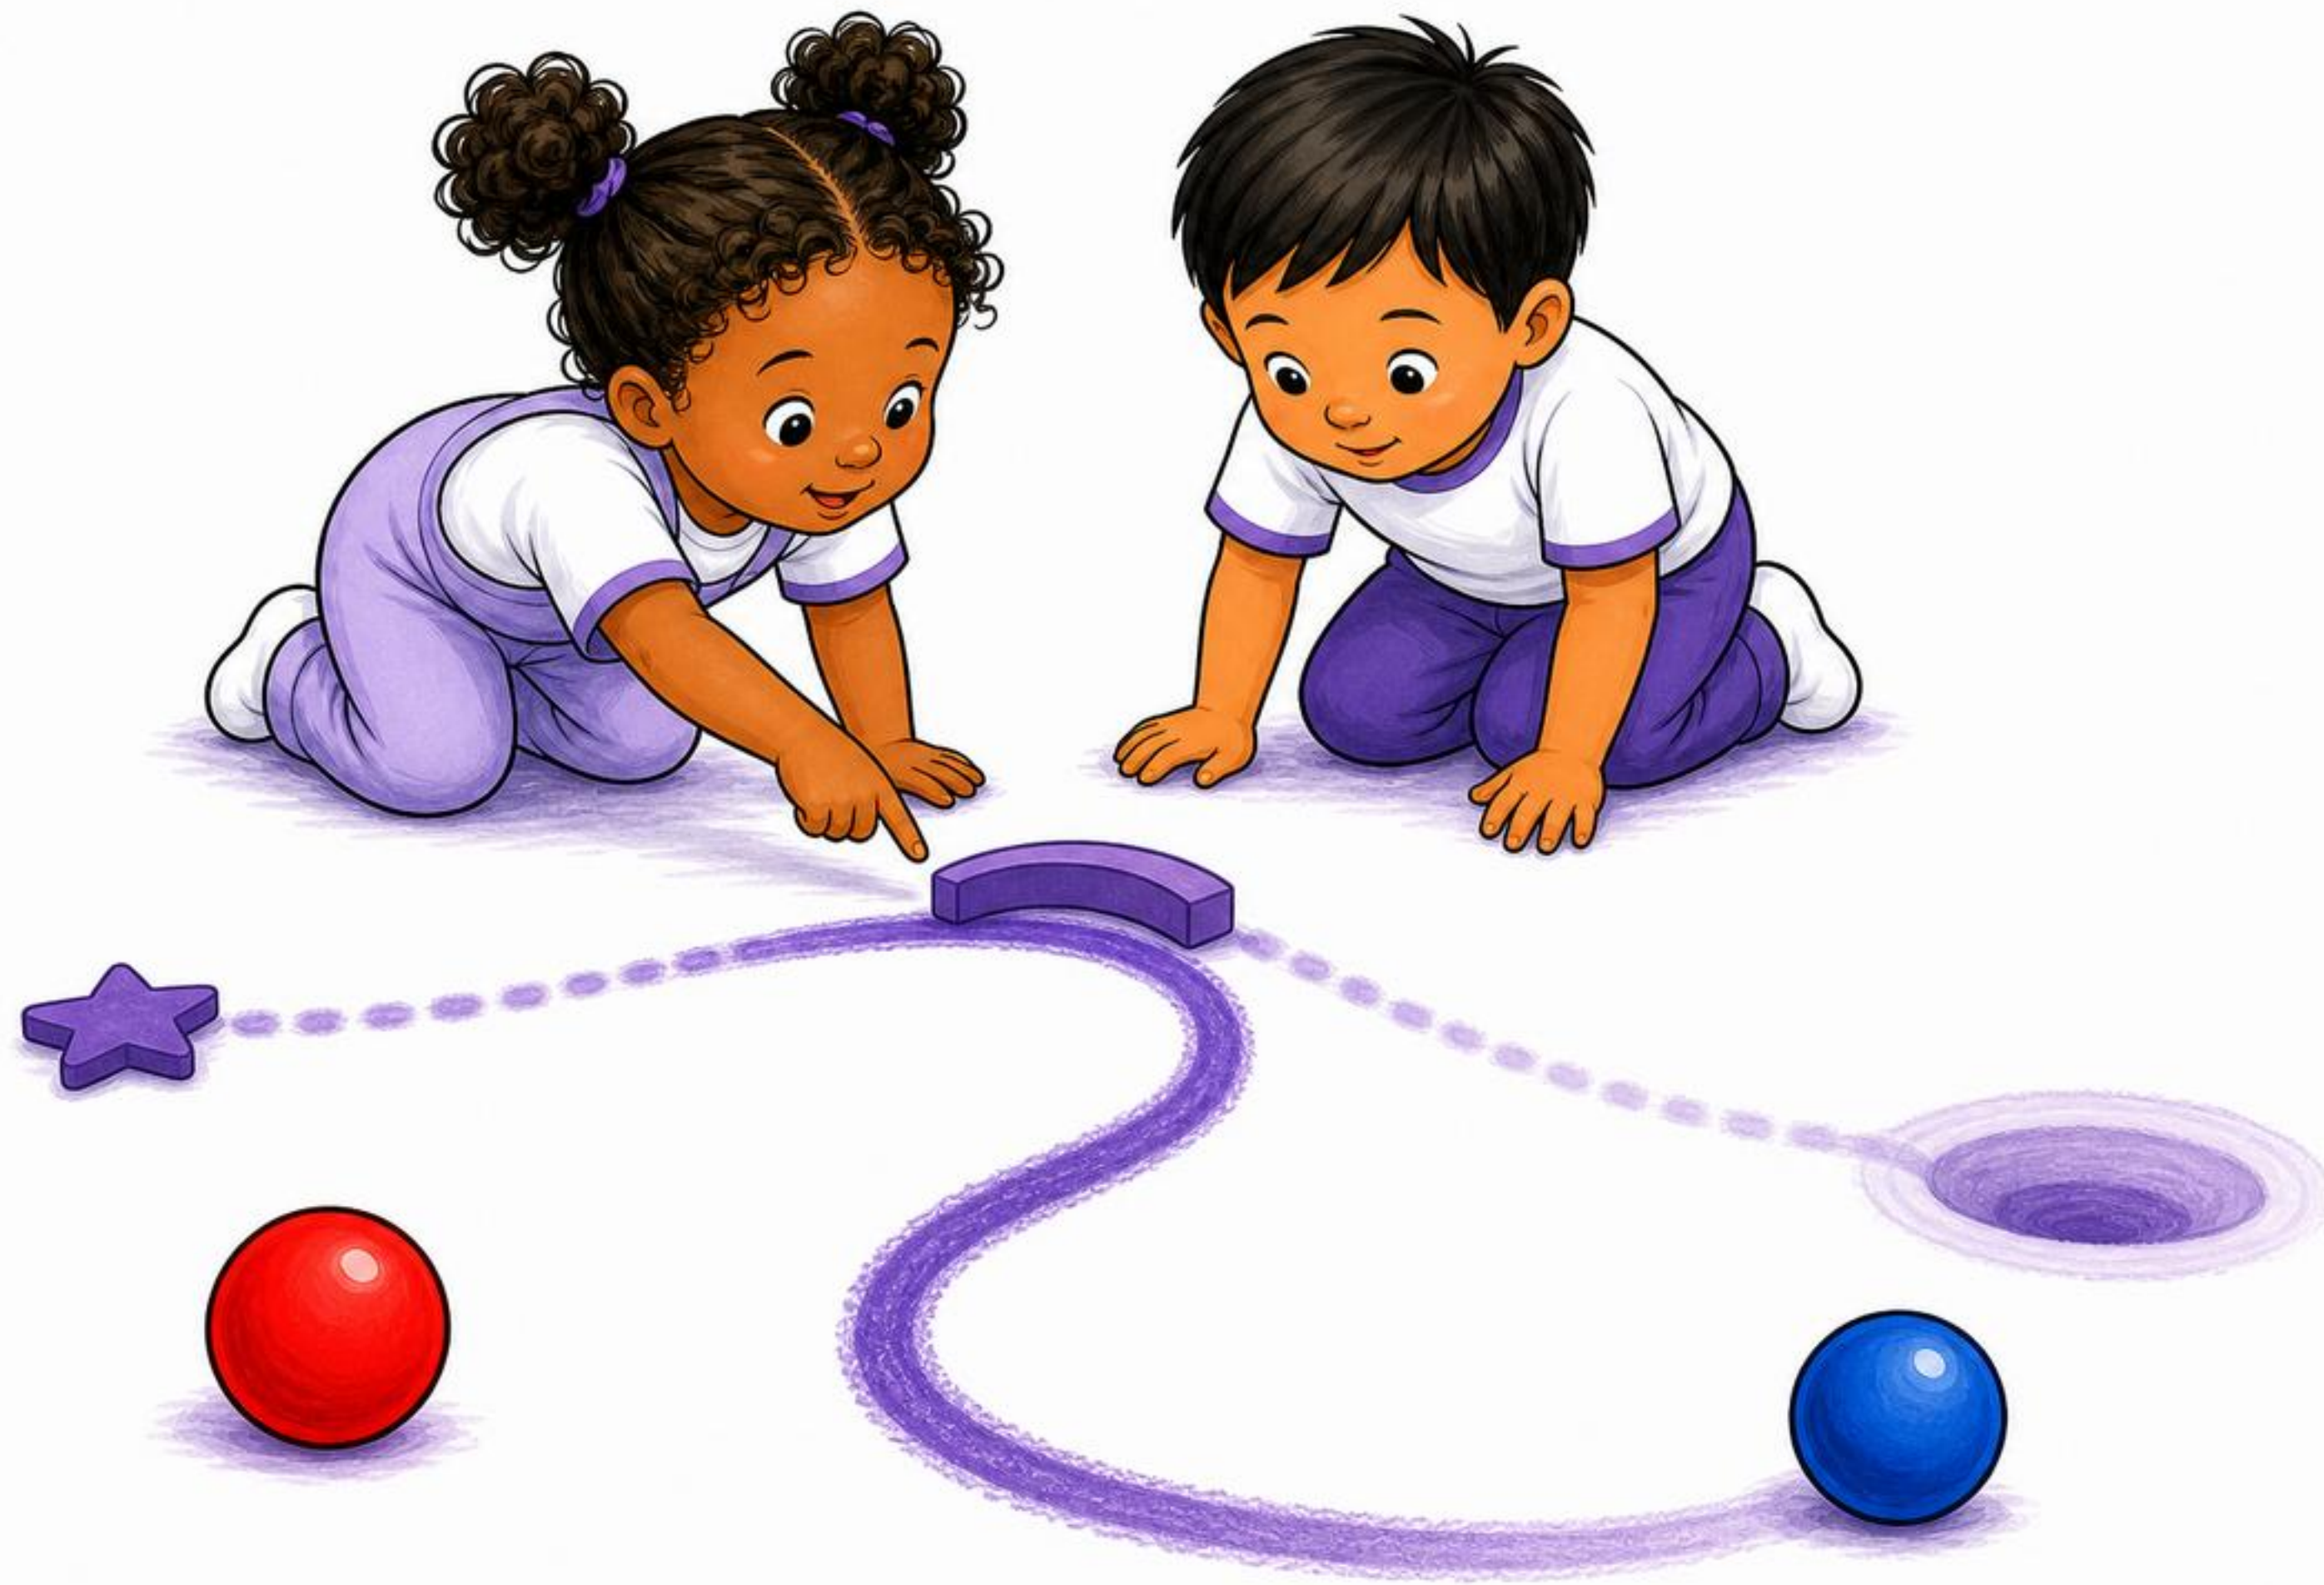

Old path.
New path.
What changed?

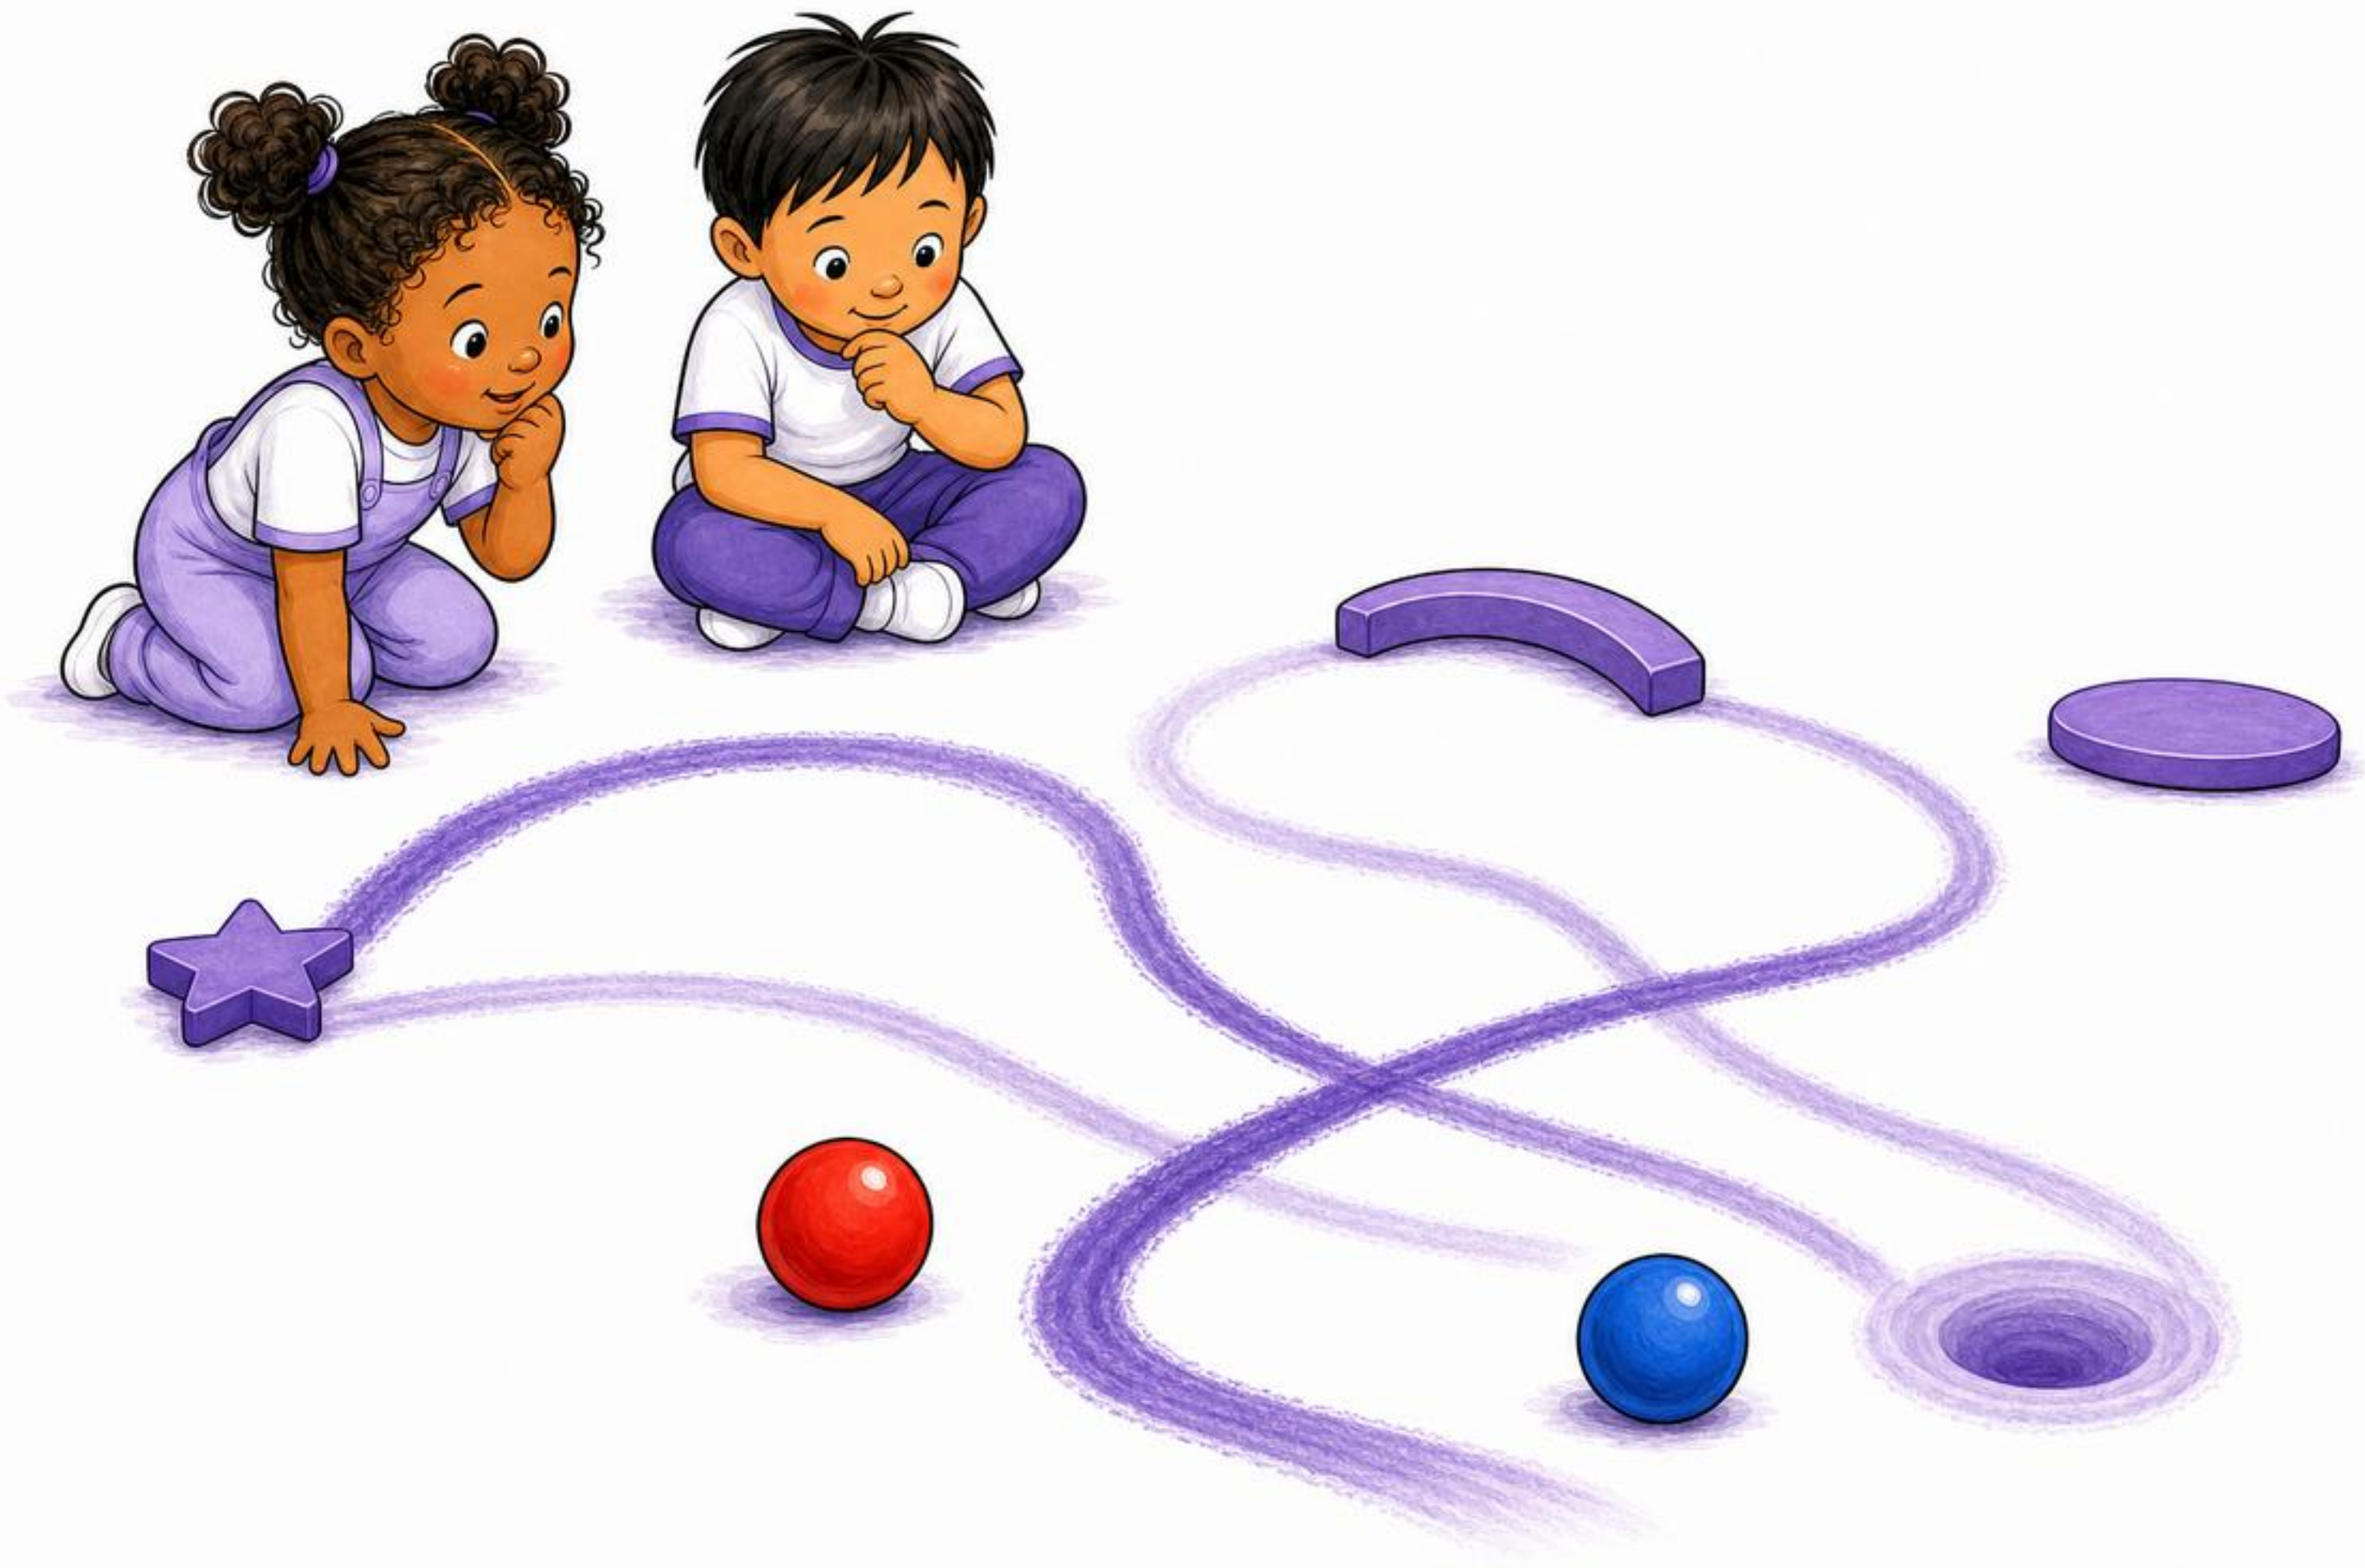

They swapped in a hill.
The ball slowed near the top.

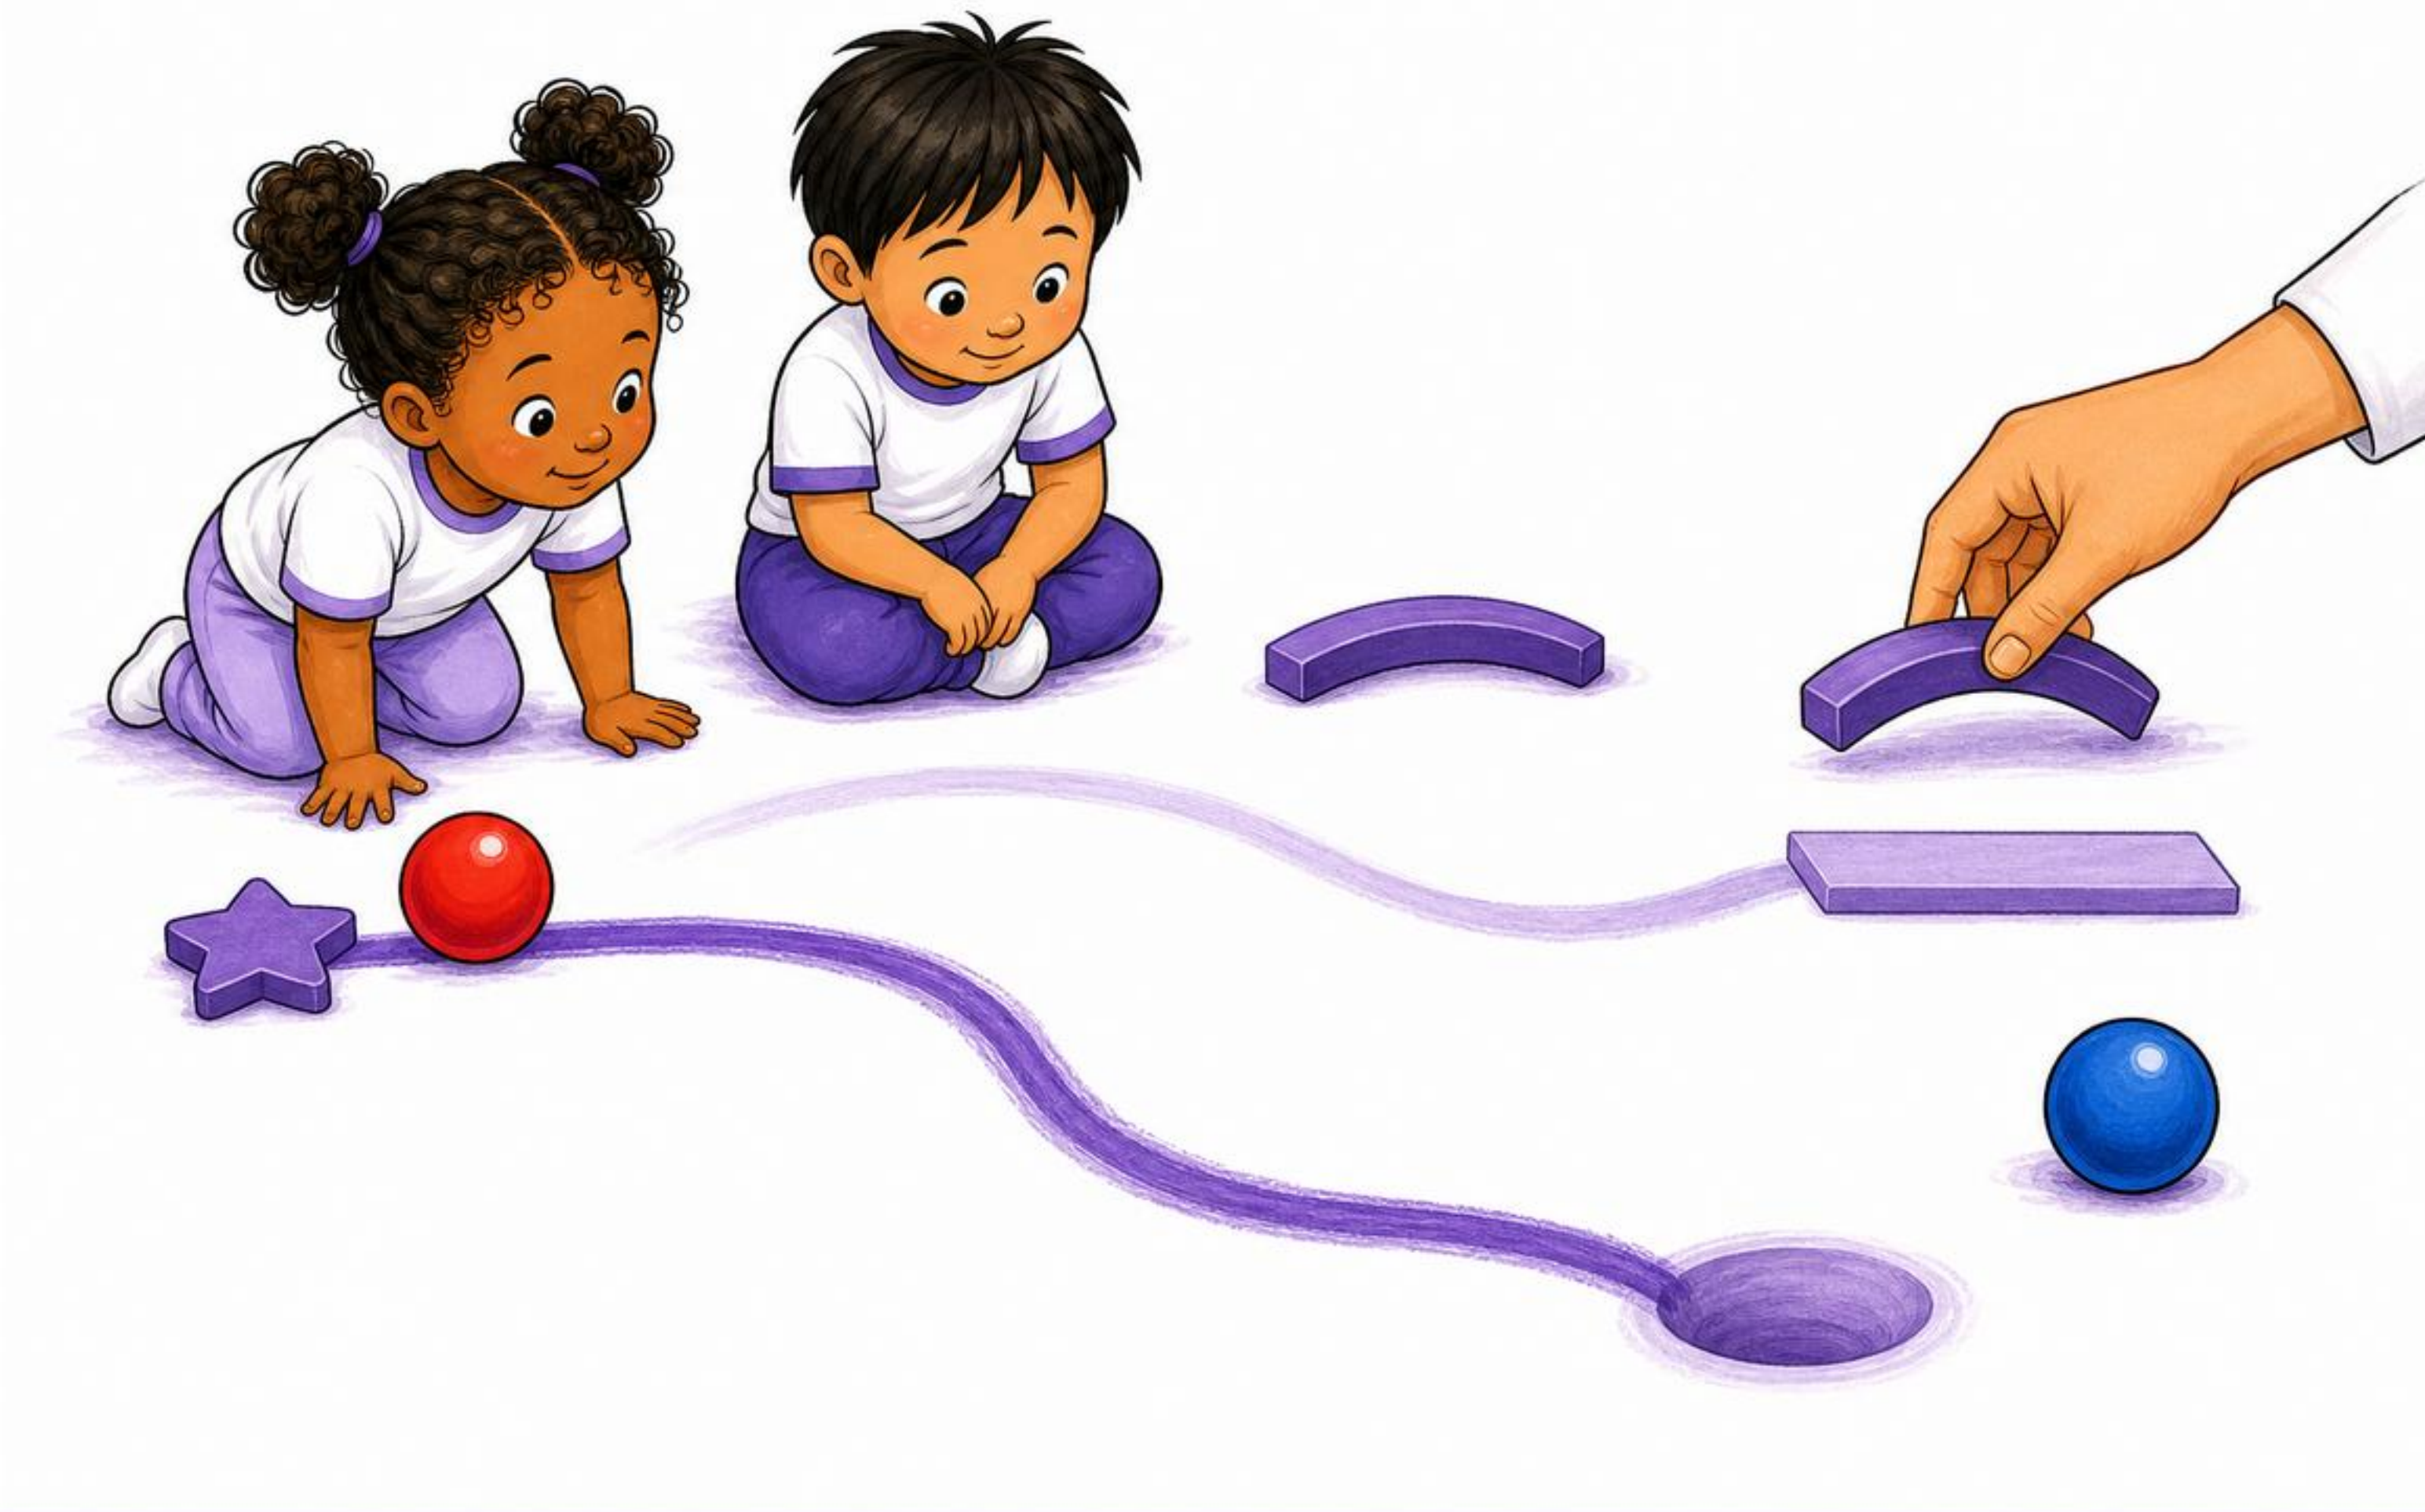

They tried a flat path.
The ball rolled straight through.

Electra pointed.
"The path changes when the ball meets something new."

"What should we change next?"
Poz asked.

Change one thing.
Compare what happened.
