

Fundamental Entities

Absolute Time and Space

1D
Linear
Time

Absolute Time and the Euclidean Void.

The fixed background
of the universe.

3D
Euclidean
Space

Absolute Time and Space have

No origin story.
No known bounds.
No predicted end.

Time and Space
are populated with
energetic architrinos
and their emitted
causal wake streams.

Nothing else.

Causal Wake Streams Completely Fill Time and Space.

The intersections of causal wake streams with architrinos are where the action happens.

Action

At the present time ($t = \text{now}$), each architrino responds to causal wakes arriving from the past paths of all architrinos.

A Euclidean **coordinate chart** can
describe the void.
Physical coordinates are
anchored by
**architino locations and clock
records.**

Time and Space are Absolute.

All causal wakes emitted by a stationary ($v = 0$) architrino **have the same absolute origin.**

Such a point links
Euclidean time and space
with Einstein's spacetime

The Void of Time and Space
